Player questions

- What detail in Legacy Security Skeletons tells you the official story is incomplete?
- Who notices the human cost first, and how do they show it?
- What small object, smell, or sound makes this scene feel real?

GM notes

- Use them to teach group attacks and countdown progress.
- Keep player-facing information actionable. Reveal systemic truth through objects, reactions, and consequences before naming it.
- Manufactured-threat lens: seed the contradiction, do not explain it. The surface goal stays simple and heroic.
- [FLAG/SEED] Optional flag: Legacy Skeletons carry scraps of old corporate credentials.

Checks and rolls

- Strength or Agility Break formation or intercept strikes. Standard Keep skeletons from the Custodian. 15 Cleanly resolve: Break formation or intercept strikes. Add a concrete boon, extra clue, or improved position. Success, plus the player names one helpful detail or asks one follow-up question. Success, but the GM exposes a cost, ticks a countdown, or reveals a new pressure tied to Legacy Security Skeletons. The full goal slips, but the party still learns a useful truth or avoids the worst consequence. The GM makes a hard move that follows from the fiction and leaves the next choice visible. Spend Fear to tick the ritual countdown, expose the Custodian, activate ward backlash, or trigger Market Correction. On mixed or sliding results, reveal information in layers: visible fact, actionable clue, then systemic truth.
- Knowledge Exploit obsolete protocols. Hard Redirect one skeleton for a beat. 20 Cleanly resolve: Exploit obsolete protocols. Add a concrete boon, extra clue, or improved position. Success, plus the player names one helpful detail or asks one
