

Mountain Crabs

Hook

Player-safe note: Granite-shelled cliff crabs with moss and alpine flowers growing on their backs, stone-heavy claws, many gripping legs, and wary eyes made for vertical roads.

Observed Form

Huge stone-shelled crabs adapted to cliffs, granite armor, moss and small alpine flowers, many legs gripping rock, and beadlike wary eyes.

Behavior

Grumpy granite tenants of the cliff with gardens growing on their own backs. Not malicious, just enormous and territorial on a road where one bad step is the last. They were here long before the climbing route and resent the traffic.

Warning Signs

Falling, fire, and the vibration of too many boots drumming on their rock.

You Could

- Give it distance before deciding it is hostile.
- Read posture, tracks, and what it is protecting.
