

Duality Dice

What it is

Roll a Hope d12 and Fear d12 together, add modifiers, compare to Difficulty.

How it works

The two d12s are rolled together. Their sum plus bonuses determines success against Difficulty. The higher die says whether the result is with Hope or with Fear. Matching dice are a Critical Success.

Step by step

- Use for Action Rolls and most player-facing uncertain rolls.
- One sets the total with the other; the higher die colors the result with Hope or Fear.
- Return to the fiction with the concrete result, cost, or benefit.

Try it

Why are there two d12s?
