

Five Roll Outcomes

What it is

Every action roll resolves into one of five table results: critical success, success with Hope, success with Fear, failure with Hope, or failure with Fear.

How it works

Use after every Action Roll or Reaction Roll where the Hope/Fear spin matters.

Step by step

- Check doubles first for Critical Success.
- If not a critical, compare total to Difficulty.
- At or above Difficulty succeeds; below Difficulty fails.
- Hope spin gives Hope and a cleaner/kinder edge; Fear spin gives the GM Fear and a cost or complication.

Try it

What does my result mean?

- Title: Five Roll Outcomes
- Tag: official
- Summary: Every action roll resolves into one of five table results: critical success, success with Hope, success with Fear, failure with Hope, or failure with Fear.
- When: Use after every Action Roll or Reaction Roll where the Hope/Fear spin matters.
- Not When: Do not flatten rolls into pass/fail when the spin should change cost, benefit, or GM pressure.
- Question: What does my result mean?
- Answer: First compare the total to Difficulty. Then read Hope, Fear, or matching dice to choose the exact result.
- Example: A Presence 12 strixwolf approach that succeeds with Fear calms the mother but lets the GM add pressure from the pack or the woods.
