- Takeawayhelp: Player takeaway The farms are a useful detour if players ask where  
 Hush's abundance comes from. "The first answer is simple: food, work, water, and  
 careful hands." "You can ask a worker, inspect the channels, trace the path south,  
 or return to the festival/hub." Player-safe use: route texture, food stakes, and  
 farm-worker conversations. instinct knowledge finesse Story takeaway The farms make  
 abundance feel earned and vulnerable. "The festival is not magic happiness. It is  
 crops, water, labor, and protection all holding together." "A deeper read finds  
 precision that feels managed. That is a seed, not a full reveal." Keep the joy and  
 labor real before showing the corporate seam. instinct knowledge finesse Mechanic  
 takeaway Instinct, Knowledge, and Finesse are the active farm mechanics. "Instinct  
 13 reads managed cultivation. Knowledge 13 traces ward-like magic. Finesse 12  
 crosses without damaging channels." "On a success, set hush\_clues=farm\_seed or  
 ward\_awareness=seed/aware." The farms should feed route and reveal pacing, not  
 become a random obstacle course. instinct knowledge finesse
