- Alt: Open Vale Ritual Arena map board.
- Caption: A circular clearing with the Custodian and Keystone at the center, skeletons rising close, and wraiths approaching from far range.
- Mood: spatial reference and location texture
- Gmgoal: Clarify first-wave positioning without replacing the finale hub map.
- Publicobjective: The ritual clearing becomes a battlefield because the ward itself is under pressure. The Custodian and Keystone hold the center while old security bodies and audit-cold spirits test every gap around them.
- Readaloud: The ritual clearing becomes a battlefield because the ward itself is under pressure. The Custodian and Keystone hold the center while old security bodies and audit-cold spirits test every gap around them.
- Gmnotes: The Custodian and Keystone hold the center; PCs form a protective ring while skeletons rise Close and wraiths pressure from Far. Skeletons rise from Close ground; Wraiths drift from Far edges toward the ritual center. Relentless but procedural; threats follow old infrastructure logic.
- Gmscript: Say: "This is the tactical view for holding the line: center, defensive ring, emergence points, and clustering danger."
- Gmreadaloud: The center is the Custodian. The ring is the party. The emergence points are where the rusted dead claw up.
- Gmchecklist: Use for S05-03 first wave. Tick -1 per skeleton defeated. Spend Fear for Group Attack if clustered. Return to the hub or move to the peak maps.

- Gmprivate: This map is not redundant with the location hub: hub = whole finale, MAP-S05-03 = skeleton-wave tactics.
- Playertakeaway: The ritual clearing becomes a battlefield because the ward itself is under pressure. The Custodian and Keystone hold the center while old security bodies and audit-cold spirits test every gap around them.
- Storytakeaway: The first wave teaches the table that protection and progress are the same thing.
- Mechanictakeaway: The tactical map supports countdown ticks, Group Attack warnings, and protected_whom seeds.

- Mechanicids: countdown group-attack fear evasion damage-thresholds
- Fearsponds: Environment Feature ? Market Correction (canon): spend a Fear to summon two additional Legacy Skeletons from the ground within Very Close range of a PC. Use it to keep the countdown moving (skeletons die easily ? countdown ticks down on each defeat). The Wraiths' Memory Delve and Pass-Through are your big Fear spends ? use Pass-Through sparingly (it can lock a PC out; if the whole party goes Untethered they all mark 2 HP and snap back). Spend Fear: the open sky flickers ? for one beat

the stars rearrange wrongly (Forgotten Gods watching). Narrative dread, no mechanics.

- Choicesconsequences: Use the tactical line map when skeleton positioning matters. The map clarifies the active table choice instead of becoming a side route. Use the map only when spatial clarity changes the next roll, countdown tick, or protection choice. The result carries forward through Act 5 state rather than adding a new branch. ritual_countdown / protected_whom Reward: clearer play. Cost: pause only long enough to orient the table. GM-facing
- Spoilers: GM-only location fields, combat notes, canon notes, and hidden-truth context stay off the player display.
