- Image Prompt: Private table TTRPG story atlas asset for Legacy Security Skeleton, Enemy / Combatant. Role: Soul-debt canon combatant.. Summary: Obsolete security protocols made bone and rust.. Cinematic fantasy concept art, readable silhouette, no visible text, no UI, no watermark. Do not include the Strixwolf Mother, strixwolf pups, wolves, owlbeats, or animal companions.
- Personality: Not malice, momentum. A duty that outlived the man and a debt that kept the bones. Somewhere under the patrol loop is someone who wants, very quietly, for the post to finally fall.
- Wants: Hold the post because the old order is the only command still left.
- Fears: No fear as a tactical creature; the person-layer feared leaving loved ones with the debt.
- Secrets: Each skeleton still carries a trace of trade, family, and grievance if the GM gives it a moment.
- Body Language: Checks exits and cargo before glory. Fear makes the violence practical rather than theatrical.
- Sample Dialogue: Permit... expired. Post... must hold. Debt remains. Door remains.

- Equipment: rusted sword old security token bone tag
- Search Or Loot: Rusted sword, old ward token, brittle security seal.
- Gm Use: Run Legacy Security Skeleton as a threat with a motive, a pressure point, and something left behind that explains why the fight happened. Use this page to seed the manufactured-threat reframe without turning it into exposition.
- Future Hooks: Bring back as an echo if players made a strong choice involving this entity. Can become evidence in the future Relay Spire manufactured-threat investigation.
- Stat Summary: Use module stat block. Group Attack requires Fear.
- Robust: Legacy Security Skeleton: Obsolete security protocols made bone and rust. Use the stat pressure, but keep the story pressure tied to the system that produced the threat. Give one concrete visual, one sound or texture, and one sign of who has used or neglected it. Win the immediate objective connected to Open Vale? Ritual Site, Market Correction, not simply kill the party. Failing the people or protocol behind them, being captured without being heard, or learning the fight served someone else's ledger. Run Legacy Security Skeleton as a threat with a motive, a pressure point, and something left behind that explains why the fight happened. Knowledge / Instinct / Presence as fits the table 15 Learn the clean fact about Legacy Security Skeleton and one deeper connection. Learn the useful fact and gain a follow-up question. Learn the fact, but reveal who notices, who is endangered, or what timer advances. Miss the full answer, but gain a sensory clue or safe next step. Misread the pressure and invite a GM move tied to cost, custody, or danger. Spend Fear to reveal the system behind the object, move a threat closer, or make a choice more costly. Loreborne / Knowledge: names the...
- Manufactured Threat: FLAG: scraps of old corporate credentials can cling to them, hinting at past soul-debt labor.
- Mechanics: Combat / Bypass Mechanics Players can fight, capture, interrogate, or bypass Legacy Security Skeleton when it is present in the fiction. Use the roll only when the player's method, stakes, and consequence are concrete. Surface read: Obsolete security protocols made bone and rust. Give obvious visible facts freely; roll for meaning, risk, leverage, cost, or a hidden angle. entity-legacy-security-skeleton-engage-legacy-security-skeleton entity-legacy-security-skeleton Engage Legacy Security Skeleton Engage Legacy Security Skeleton Agility Strength Finesse Presence Knowledge Instinct Agility Strength, Finesse, Presence, Knowledge, Instinct 15 Choose the trait from the player's method, not the entity type. A flat read of Legacy Security Skeleton hides the cost, motive, or useful next step. Critical Success: best possible version of the action; gain Hope and clear 1 Stress. Add an extra benefit that follows from the fiction. Success with Hope: the PC gets what they wanted and gains Hope. Keep the position clean or generous. Success with Fear: the PC gets what they wanted, but the GM gains Fear and introduces a cost, complication, or pressure. Failure with Hope: the PC does not get the...

- Npc Profile: npc-profile-v1 NPC_System_Packet + image-informed hardening True Legacy Security Skeleton a rusted dead guard still obeying a security routine nobody living remembers A rusted skeleton guard in chain scraps and bead charms stands with a cracked skull, old badge fragments, and road-dust still clinging to the bones. Legacy Security Skeleton: a rusted dead guard still obeying a security routine

nobody living remembers Legacy Security Skeleton LEG-uh-see seh-KYUR-ih-tee SKEL-eh-tun a rusted dead guard still obeying a security routine nobody living remembers Soul-debt canon combatant. Combat pressure with a person-layer; remembrance and release matter. Do not run them as empty bones. Each was a worker, guard, or debtor before the protocol trapped them. A fight A mercy/release angle A clue that old contracts can outlive bodies Rigid, brittle, and trapped in repeated duty. Name, remembrance, or proof that the old duty has ended. Hold the post because the old order is the only command still left. Under the command, a buried person wants the duty to end and the debt to stop using their bones. Hold the post because the old order is the only command still left. Under the command, a buried...
