

Roll Slider

What it is

Kyle's optional degree-of-success overlay: the total says how far above or below Difficulty the result lands while Hope/Fear sets the spin.

How it works

Use when a clue, negotiation, or set piece benefits from richer tiers than pass/fail.

Step by step

- Use when a clue, negotiation, or set piece benefits from richer tiers than pass/fail.
- It tells you how much they get: botch, miss, hit, clean, soar, or crit, while Hope/Fear still colors the result.
- Return to the fiction with the concrete result, cost, or benefit.

Try it

What extra thing does the slider add?

Raw source

- Id: roll-slider
- Title: Roll Slider
- Tag: adaptation
- Summary: Kyle's optional degree-of-success overlay: the total says how far above or below Difficulty the result lands while Hope/Fear sets the spin.
- When: Use when a clue, negotiation, or set piece benefits from richer tiers than pass/fail.
- Not When: Do not replace official Daggerheart outcomes; keep 2d12 Hope/Fear as the baseline.
- Question: What extra thing does the slider add?
- Answer: It tells you how much they get: botch, miss, hit, clean, soar, or crit, while Hope/Fear still colors the result.
- Example: At S01-03, Presence 12 with a high total may calm the strixwolf and reveal the corpse; the Fear spin can still call distant pack pressure.

sets the spin. It tells you how much they get: botch, miss, hit, clean, soar, or crit, while Hope/Fear still colors the result. Use when a clue, negotiation, or set piece benefits from richer tiers than pass/fail. This is #adaptation. It adds degree to a Daggerheart roll but never replaces official Hope/Fear or critical rules. Roll Slider: Kyle's optional degree-of-success overlay: the total says how far above or below Difficulty the result lands while Hope/Fear sets the spin. Use when a clue, negotiation, or set piece benefits from richer tiers than pass/fail. It tells you how much they get: botch, miss, hit, clean, soar, or crit, while Hope/Fear still colors the result.
