

S01-03 - The Strixwolf Mother

Player read-aloud

A creature steps from behind the cart: wolf-bodied, owl-faced, wings folded tight. Two pups stumble behind her. Her eyes judge whether you are danger or mercy.

Scene summary

A strange winged wolf-owl mother guards her pups while feeding from the dead driver.

Visible choices

- Soothe her
- Attack her
- Back away
- Inspect from afar

Player questions

- Who notices the Strixwolf pups first, and why does that matter to you?
- What do you do with your hands so the mother knows you are not hunting?
- What sound tells you this is a parent, not a monster?

- Long Storyboard: The obvious monster is not necessarily the killer. She is frightening, hungry, and protective. This is a moral scene disguised as a monster scene. Run this scene as threshold into branded wilderness and first moral test: The Strixwolf Mother is dangerous, frightened, and probably not guilty of the murder. Keep the camera close to practical choices, visible consequences, and the difference between ordinary people and the infrastructure pressing on them.
- Read Aloud: A creature steps from behind the cart: wolf-bodied, owl-faced, wings folded tight. Two pups stumble behind her. Her eyes judge whether you are danger or mercy.
- Gm Notes: She is feeding on the driver but probably did not kill them. The slit throat clue points elsewhere. Keep player-facing information actionable. Reveal systemic truth through objects, reactions, and consequences before naming it. Use the generic Strixwolf profile only if the encounter escalates beyond the mother protecting her pups. Manufactured-threat lens: seed the contradiction, do not explain it. The surface goal stays simple and heroic. [REFLAVOR/GUARANTEED] The Strixwolf Mother is feeding pups and guarding them; she reacts to tone, not bloodlust. (Presence to calm; Instinct to read boundaries) [ADD/SEED] Helping the pups or sparing the mother earns Hope now and can create a later warning boon.
- Sensory Details: warm feathers over wolf-muscle pup chirps under a broken axle old blood on a muzzle that does not match the wound
- Body Language: The mother lowers her head without lowering her wings The pups freeze when voices rise
- Sample Dialogue: Khari Nix Nobody touches the little ones unless they want me in the way too.
- Checks: Presence or Instinct Calm, redirect, or understand the mother. Standard Gain `strixwolf_trust +1` if handled with mercy. 15 Cleanly resolve: Calm, redirect, or understand the mother. Add a concrete boon, extra clue, or improved position. Success, plus the player names one helpful detail or asks one follow-up question. Success, but the GM exposes a cost, ticks a countdown, or reveals a new pressure tied to The Strixwolf Mother. The full goal slips, but the party still learns a useful truth or avoids the worst consequence. The GM makes a hard move that follows from the fiction and leaves the next choice visible. Spend Fear to reveal omitted risk, split attention, or put a human cost in front of the contract. On mixed or sliding results, reveal information in layers: visible fact, actionable clue, then systemic truth.

- Choices Consequences: Spare or help her She withdraws with the pups and may warn the party later. Gain Strixwolf Mercy payoff. Attack first The fight is loud and costly. Bramble Union may gain surprise; Hush reaction can sour.
- Clues: Wound mismatch The creature scavenged. Humanoids killed Tamsin. The dead driver's wound is too clean for the strixwolf. - Player Questions: Who notices the Strixwolf pups first, and why does that matter to you? What do you do with your hands so the mother knows you are not hunting? What sound tells you this is a parent, not a monster?
- Relationship Prompts: Which PC quietly checks on someone else here? Who disagrees about the right thing to do without breaking trust?
- Ownership Prompt: Name one detail in The Strixwolf Mother that belongs to your character's point of view.
- Reveal Hooks: Loreborne or Knowledge-focused PCs can read the institutional layer. Wildborne/community-focused PCs can read local custom and ecological stress. Martial/security-focused PCs can read threat posture and custody logic. Magic-focused PCs can feel ward tone, soul-signal, or spell instability. Loreborne: spots older legal, heraldic, or ward-craft language under the branding. Underborne: notices service doors, hidden routes, and who built the thing nobody credits. Highborne: reads etiquette, class panic, and reputational risk. Ridgeborne: notices stonework, weight, pressure, and structural weakness. Wildborne: reads the land, animals, and local ecological stress. Elf/Ribbet/Human/Giant/Katari: invite one sensory or social detail from the player's heritage. Sorcerer/Rogue/Warrior/Guardian/Ranger: give each class one table-facing way to shine without changing the plot.
- Fear Spends: Spend Fear to reveal omitted risk, split attention, or put a human cost in front of the contract. Make the safe road feel less safe: noise, scent, cracked wheel, or cargo hum. Separate evidence from assumption so a monster read is tempting but incomplete.
- Story Scope: Perceived antagonist: the forest. True antagonist: the corporate lie about the forest. The players never confront it directly. They are meant to feel it by the end. Every act offers at least one guaranteed and one earned hint that the danger is manufactured and the forest is not the enemy.
